

Ottawa July 20, 2016

Live Vue Technologies Inc. announced today that it has acquired the intellectual property of Dr. Hassan Moghadam in relation to the “Smart Drill” technology for quality assurance in dental implant surgery. This includes issued U.S. and Canadian patents and pending in other jurisdictions. Live Vue is embarking on a rapid prototyping program expected to involve a clinical trial within the next 6 months.

Dr. Moghadam, an internationally recognized Oral Surgeon, has joined Live Vue as President and CEO.

About Live Vue Technologies Inc.

Live-Vue Technologies Inc. is a privately held Canadian Biophotonics company. Our first product, the Smart Drill, is a cost effective, patented product to improve quality and safety in the large and growing dental implants market. The product has an expedited path to market as a Class 2 medical device.
